Cybersecurity Awareness

Product Summary

When cookie-cutter elearnings no longer produce desired outcomes with your employees, it's time to consider personalized, interactive cybersecurity awareness sessions, delivered by a team of leading cyber-experts and dynamic instructors.

CyberBlazer™ by EM3|LABS is an innovative Cybersecurity Awareness program that will help you to empower your workforce and keep your organization safe.

Tailor Made Cyber-Awareness Programs for your Organization

Our cyber-awareness programs are customizable for your specific circumstances. Our training sessions can be from as low as 2 hours to sessions carrying over multiple days.

Generally speaking however, we cover what we consider to be core security-awareness topics in all our delivery modules, as described here.

We feel these will give your workforce a decent exposure to cybersecurity, without bogging them down with too many technical details.

CyberBlazer
EM3|LABS

Cyber Threat & Cybercrime Landscape

We use this module to introduce the diversity of cyber attack vectors and why anyone from senior executives down to junior employees are an attractive target. We further explore geopolitical elements to cybercrime.

Demonstration: How Cyber Attacks are Performed

It is human nature to believe that cybercrime only happens to other people, not ourselves. We further believe we cannot possibly be a victim because we have nothing of value or nothing to hide. We use this module to perform a live or simulated hack to illustrate just how easy anyone could fall prey.

Malware, Ransomware, Phishing & Social Engineering

Cyber threats are numerous and while we cannot cover everything in a single session, we do go over some of the most common cyber attacks and we review ways to recognize scams and how to avoid being a victim.

Identity Theft & Online Safety

With many people having Facebook accounts and other social media profiles, stealing ones identity has become a frequent occurrence. We present insights into data privacy and its importance to you as a user. For our EU clients, we further introduce GDPR and associated regulatory concerns.

Mobile Device Cybersecurity

Mobile phones and tablets are just as vulnerable as PC's. We use this module to guide users into securely using their mobiles and apps.

Co-branded Office Accessories: A Visual Reminder to Think Cyber!

Your Employees will Remember to stay Cyber Vigilant and to Think Twice Before Clicking Online

USB Data Blockers

Screen & Keyboard Cleaners

To further enhance the user experience, we propose the option of distributing various promotional office materials, co-branded with your logo and that of our CyberBlazer™ program.

We have a wide range of promotional materials from tote-bags & stationary to computer and mobile accessories such as web-cam covers, mouse pads, laptop cleaners, USB Data Blockers and more.
